## Reports and Report Writer

---

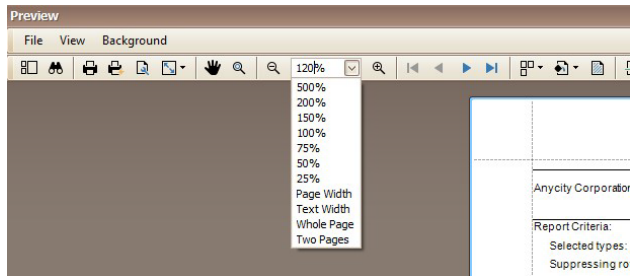

We will be going over:

- Caselle Masters
- New Reports Style Features
  - Preview and Formats
  - Drill Down Options
- Setting Up Reports
  - Report Options
  - Additional Options (New Reports)
  - Columns
  - Sections (Old Reports)
  - Prints Settings
  - Saving
  - Setting Default Reports
- Review Individual Reports
- Report Writer

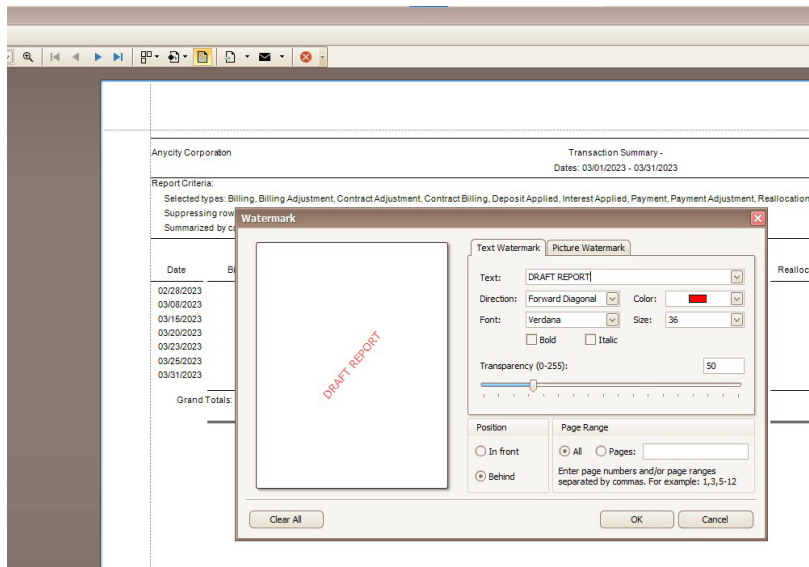

## New Report Preview Window

There are several new features in the 'new' report preview window including:

- Continuous scrolling/Navigation
- Changes to zoom and scaling

- Watermarks

## New Report Export Formats

Reports can be exported directly from the preview window and either saved to a file or sent directly to your email client:

The screenshot shows a 'Preview' window with a menu bar (File, View, Background) and a toolbar. The report content includes the company name 'Anycity Corporation' and 'Report Criteria: Selected types: Billing, Billing Adjustment, Contract Adjustment, Contract Billing, Deposit Applied, Interest, Payment Adjustment, Reallocation, with no transactions Summarized by calendar day'. A table of data is displayed below.

Date	Billing	Billing Adjustment	Contract Adjustment	Contract Billing	Deposit Applied	Applied	Payment	Payment Adjustment
02/28/2023								
03/08/2023	-	-	-	-	-	-	1,009.03-	-
03/15/2023	-	-	-	-	-	-	915.57-	-
03/20/2023	-	-	346.49-	-	-	-	-	-
03/23/2023	-	-	-	-	-	-	517.38-	-
03/25/2023	67.08	-	-	-	-	-	-	-

The export dropdown menu is open, showing options: PDF File, HTML File, MHT File, RTF File, DOCX File, XLS File, XLSX File, CSV File, Text File, and Image File. 'XLSX File' is highlighted.

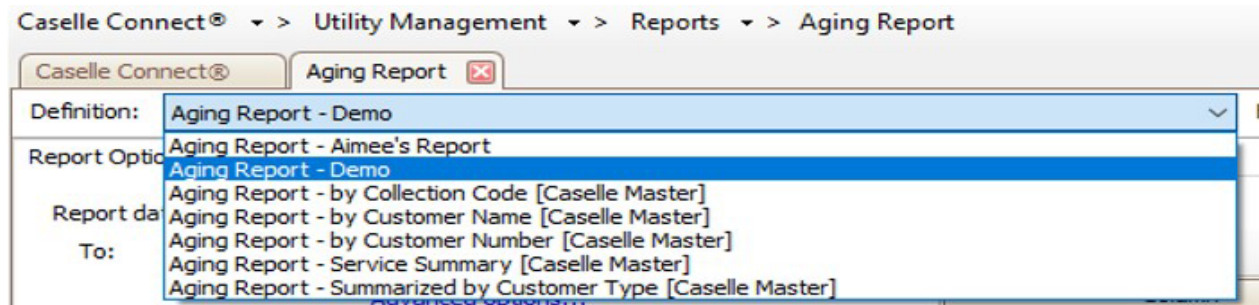

This close-up shows the export dropdown menu with the following options: PDF File, MHT File, RTF File, DOCX File, XLS File, XLSX File, CSV File, Text File, and Image File. 'PDF File' is currently selected.

## Caselle Master Reports

All of the standard reports in Caselle come with at least one Master report definition. These report definitions are used as a template. Customize them to get the needed report. The Caselle Masters cannot be overwritten. If changes are made, it will require it to be saved as a new report.

In this example, the aging report has (5) Caselle Master report definitions. Select the one that matches the closest to what is needed on the report, for example, with the report that is being created should be in customer number order select Aging Report - by customer number {Caselle Master} and make the modifications needed.

## Report Setup

Having selected a report to use as a template, it can be customized. The first tab to customize is the report options. This will have different options depending on which report is being used.

The Report Date(s) to use for the report is at the top left.

Options specific to the report will be below the date.

**Report dates**  
To: 04/30/2020

☒ Include active customers  
☒ Include inactive customers  
☒ Include customers with a credit balance  
☐ Include customers with a zero balance  
☐ Include services with a zero balance  
☐ Summarize by service category

**Aging days**  
☒ Based on billing periods  
☐ Based on the days specified

**Selection criteria:**

Column	Value	Compare
Customer.Customer number	All	Entire field
Customer.Name	All	Entire field
Customer.Cycle	All	Entire field
Group Code.Group code	All	Entire field

**Report order:**

Column	Sort	Title	Total	Line	Page	Use
Customer.Customer number	Ascending	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Entire field

**Report sections:**

Section	Print	Headings	Detail	Totals	Line	Page
Main	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Service Detail	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Service Summary	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Data on the report will meet the criteria entered on the top right.

Data will print on the report in the order specified in Report Order.

Sections to print on the report are controlled in Report Sections

Cassell is in the process of rewriting all of the reports. The new reports will have a white background as shown above. The old style reports have a gray background. For this tab, both are the same except the report section is on a separate tab in the old style reports.

Dates: under the dates field is advanced options this will allow the default date type to be selected. The options are all, calendar day, calendar month, calendar year, custom, cycle, period or a prompt.

Options: Check the box or radio dial of the options to include on the report. These are unique to each report. A few examples are:

Three screenshots of report configuration options. The first screenshot shows a list of checkboxes for including customers with an A/R balance of zero, final billed customers only, credit services only, and summarizing by service category. Below these is a 'Selected services' section with a list of services (Garbage, Yard Light, Sales Tax, Penalty, Electric, Water, Sewer, Tap Loans) and a 'Select...' button. The second screenshot shows 'Aging days' options with radio buttons for 'Based on billing periods' (selected) and 'Based on the days specified'. Below are 12 aging periods from 30 to 360 days. The third screenshot shows 'Types' of billings with checkboxes for 'Billings', 'Billing adjustments', 'Contract adjustments', and 'Contract billings'. Below are checkboxes for printing final billings only, manual billings only, customers with service amounts only, service status with service amount, quantity columns for non-metered services, summarizing by service category, and processing each period separately.

Section Criteria: Each report will have some standard selection criteria field set up. If you will be using one or more of these to narrow the criteria, double click on the word “All” or highlight the field and click  if it's a new style report. The enter values pop up will open.

Selection criteria:

Column	Value	Compare
Customer.Customer number	All	Entire field
Customer.Name	All	Entire field
Customer.Cycle	All	Entire field
Group Code.Group code	All	Entire field

Enter Values

Column: Customer.Customer number

All

Enter value:

Add Value Range End

Help OK Cancel

From here individual or a range of values can be entered or selected using the  and either Add Value for specific value or Range End for a Range of values.

It can be setup to Prompt for value when printing or previewing the report

Operators can also be used to select the criteria. The Operators available will depend on the field.

Enter value:

Add Value Range

Help

Report order:  Section Column

Operators - Prompt for value

- [=] Equals
- [<>] is not equal
- [>] Greater than
- [>=] Greater than or equal to
- [<] Less than
- [<=] Less than or equal to
- [and]
- [or]

To add additional criteria, click on the  or double click in the white/grey area of the selection criteria box. This will bring up a list of any available fields that can be used as selection criteria for this report. Find the field needed and select it to move it to the right side. Then click OK.

Selection

Please select the appropriate criteria fields...

Available criteria fields:

- [Report].Last payment amount
- [Report].Last payment date
- [Report].Last shutoff date
- [Report].Master contact name
- [Report].Master contact number
- Collection Code.Adjustment Entry warning
- Collection Code.Collection code
- Collection Code.Due date days
- Collection Code.Override due date
- Collection Code.Payment Entry warning
- Collection Code.Remove when closing peri
- Collection Code.Send delinquent notice
- Collection Code.Send shutoff notice
- Collection Code.Send utility bill
- Customer Type.Customer type
- Customer Type.Residential
- Customer.Active prepaid meter
- Customer Address 1

Select -> Select All -> <- Deselect <- Deselect All

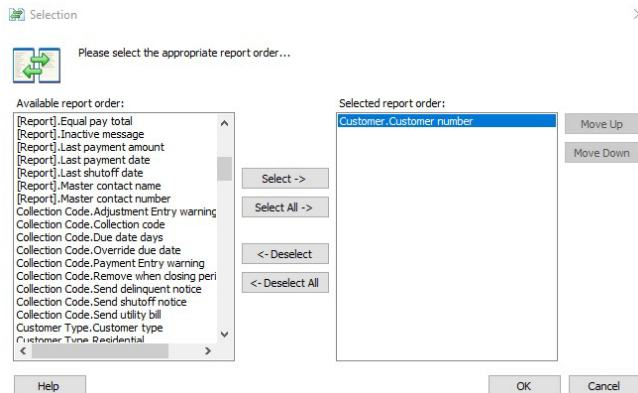

Selected criteria fields:

- Customer.Customer number
- Customer.Name
- Customer.Cycle
- Group Code.Group code

Move Up Move Down

Help OK Cancel

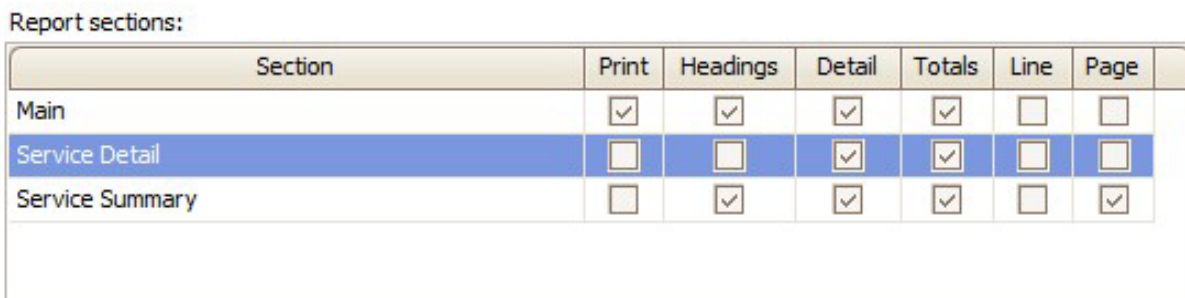

**Report Order:** Each Report will have fields set up to sort by. To add or change the sort fields, click on the  or double click on the White / Gray area of the report order box. This will bring up a list of any available fields that can be used as sort criteria for this report. Find the field needed and select it to move it to the right side. Sort order is important; the field can be moved into the correct order by using move up and move down buttons. Once the fields are in correct order, click OK.

The report order is used to determine ascending or descending order, if the report will print a title, total, line or page break based on that field. Report order can be used on different sections of the report as well.

**Report Section:** Reports can have one or more separate sections, which can be controlled using report section. This determines if the section will print, have headings, print detail, print totals, lines or page break between sections.

The old dash style reports have a separate sections tab for the report section. It also includes some options for printing page headers/ Footers or selection criteria.

Report Options Columns Sections Print Settings

☐ Use this report title:

☒ Include page header on report ☒ Include selection criteria at beginning of report

☒ Include page footer on report ☒ Include selection criteria at end of report

Report sections:

Section	Headings	Detail	Totals	Page Breaks
Main	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Contract Summary	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Loan Summary	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Additional Options: Some report definition will have a tab for additional options (Services on some reports). These will usually give the option to select specific services, rates or meter information.

Columns: Each report will have some columns setup, Columns can be added or deleted by clicking on the  or double clicking in the white area to open the selection box.

The screenshots show the 'Aging Report' configuration in Caselle Connect. The main window displays a table of columns with headers: Line, Column, Heading, Format, Width, Justification, Total, Font, and Borders. Below this, a 'Selection' dialog box is open, showing a list of available columns on the left and selected columns on the right. The selected columns are: Customer Name, Customer Customer number, [Report].Balance, Customer Telephone 1, and Customer Veteran. The dialog also includes 'Move Up', 'Move Down', 'Select ->', 'Deselect', and 'Deselect All' buttons.

From here columns can be Selected from the left side or Deselected from the right side to get the exact columns needed. The Move Up and Move Down buttons will allow the columns to be put in the preferred order.

Columns: Each column has setup options on the right side or on the bottom on the old-style reports.

This panel shows the configuration for the 'Customer.Name' column. It includes fields for 'Report line' (set to 1), 'Heading' (',Name'), 'Justification' (Left), 'Format' (Custom: 20 ch), 'Width' (Based on format), 'Font' (Default), 'Name' (Customer Name), 'Size' (0), and 'Export Filler' (empty). The 'Drill-down' field is set to 'Customer Inquiry'.

Heading is the Column Header this can be changed. A comma will add a line feed.

Justification or Align will determine if the column is aligned to the left, right or centered.

Total(s) either counts, sums, both or nothing for column totals.

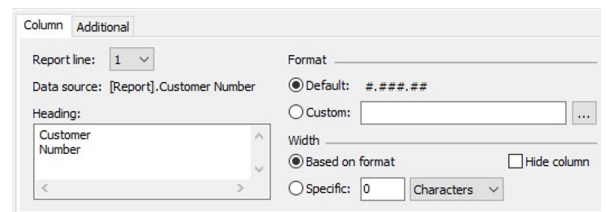

Borders can be set for the column Format is used for the number of characters, number format, date format or specific items like Account No for GL accounts.

Width can be based on characters or inches.

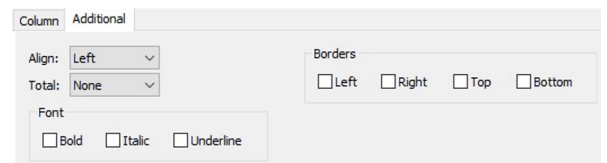

Font gives the option to bold, italicize or underline. The new style reports allow choice in type of fonts as well.

Export Filler allows a filler character like 0 to be added to if exporting a fixed length file.

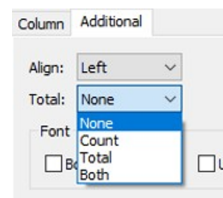

Drill-down: List the fields that can be clicked on to drill down to more information.

This panel shows the configuration for the 'Customer Number' column. It includes fields for 'Report line' (1), 'Data source' ([Report].Customer Number), 'Format' (Default: #,###,##), 'Width' (Based on format), and 'Hide column' (unchecked).

This panel shows the configuration for the 'Customer Number' column. It includes fields for 'Align' (Left), 'Total' (None), 'Font' (None), 'Borders' (Left, Right, Top, Bottom), and 'Font' (Bold, Italic, Underline).

This panel shows the configuration for the 'Customer Number' column. It includes fields for 'Align' (Left), 'Total' (None), 'Font' (None), 'Borders' (Left, Right, Top, Bottom), and 'Font' (Bold, Italic, Underline).

Columns: Some Reports will have more than one line of information for each record. These lines can be added or removed in the column tab.

Line	Column	Data Source
1	Customer.Name	,Name

The icon bar on the new style reports has icons for each of the tasks that can be done to add, move or remove either columns or lines. The old has the tasks listed in the bottom left-hand corner.

Line	Data Source	He
1	[Report].Customer Number	Customer,NumB
1	[Report].Name	,Name
1	[Report].Balance	,Balance
1	[Report].Services	,Services

**Tasks**

## Billing Exception Report

The billing exception report has 2 masters: one is for unbilled active services and the other is for billed inactive services. The unbilled active services is more popular. It will list each account that has services that have not been billed. For this report, miscellaneous and penalty services are normally deselected on the additional options tab so it doesn't list every account.

Anycity Corporation		Billing Exception Report - Unbilled Active Services		Page: 1
		Report Dates: 03/01/2020 - 03/31/2020		Sep 13, 2020 7:13PM
Report Criteria:				
Checking for active services that have not been billed				
Selected services: Electric, PCAC, Water, Sewer, Garbage, Yard Light, Tap Loans, Sales Tax				
Customer.Cycle = current cycle				
Customer Number	Name	Service	Exception	Billing Status
1.101.01	Acme Manufacturing	PCAC	Active service not billed	Active

Anycity Corporation		Billing Exception Report - Billed Inactive Services		Page: 1
		Report Dates: 04/01/2020 - 04/30/2020		Sep 13, 2020 7:15PM
Report Criteria:				
Checking for inactive services that have been billed				
Customer.Cycle = current cycle				
Customer Number	Name	Service	Exception	Billing Status
2.147.01	Carter, Clayton	Electric	Inactive service billed	Disconnected
		Water - Meter 2	Inactive service billed	Disconnected
		Water	Inactive service billed	Disconnected
		Sewer	Inactive service billed	Disconnected
		Garbage	Inactive service billed	Disconnected
		Sales Tax	Inactive service billed	Disconnected

## Billing Rate List

The billing rate list is relatively new report that list each account and the services that were billed for that service or each rate that the customers billed that rate. It will note if the amount billed matches the billing rate, if it has been prorated, if it's consolidated billing or if the multi month option was used in calculating the amount.

## Billing Register

The billing register is used to make sure billing is correct. This is one of the reports that normally is exported to excel so it can be sorted by the total bill and the billing clerk can quickly find accounts that are billing high and may need to be reviewed. It can list service detail or summarize by service category. Specific services can be selected to print on the report, for example just penalties are selected for the penalty register.

Anycity Corporation

Billing Register

Report Dates: 03/01/2020 - 03/31/2020

## Consumption Analysis Report

The consumption analysis report gives consumption history based on existing rate levels. It allows for forecasting based on historical consumption with hypothetical rates.

Anycity Corporation

Consumption Analysis Report - Water Report

Report Dates: 03/01/2020 - 03/31/2020

Page: 1

Sep 13, 2020 7:35PM

Report Criteria:

Selected services: Water

Usage from Billing Quantity

Rates without levels suppressed

Specified rate levels used

Rate: 301 (Water - Residential - City)

Level	From	To	Quantity	Consumption per Level	Rate	Calculated Amount	Customers within this Level	Customers Ending within this Level	Total Customers with Usage	Active Customers using Rate
1	1	10	10	68	1.20000000	81.60	7	1	7	6
2	11	99,999	99,989	83	0.50000000	41.50	6	6		
Total Rate: 301 (Water - Residential - City):				151		123.10				

Rate: 302 (Water - Residential - Cnty)

Level	From	To	Quantity	Consumption per Level	Rate	Calculated Amount	Customers within this Level	Customers Ending within this Level	Total Customers with Usage	Active Customers using Rate
1	1	10	10	20	1.20000000	24.00	2	0	2	2
2	11	99,999	99,989	18	0.50000000	9.00	2	2		
Total Rate: 302 (Water - Residential - Cnty):				38		33.00				

Rate: 303 (Water - Commercial)

Level	From	To	Quantity	Consumption per Level	Rate	Calculated Amount	Customers within this Level	Customers Ending within this Level	Total Customers with Usage	Active Customers using Rate
1	1	10	10	90	1.20000000	108.00	9	0	9	9
2	11	99,999	99,989	121	0.50000000	60.50	9	9		
Total Rate: 303 (Water - Commercial):				211		168.50				

Rate: 307 (Water Residential Seasonal Rate)

Level	From	To	Quantity	Consumption per Level	Rate	Calculated Amount	Customers within this Level	Customers Ending within this Level	Total Customers with Usage	Active Customers using Rate
1	1	10	10	0	1.20000000	.00	0	0	0	0
2	11	99,999	99,989	0	0.50000000	.00	0	0		
Total Rate: 307 (Water Residential Seasonal Rate):				0		.00				

## Contract List

The contract list gives a list of contracts based on the status of the contract with or without detail.

Water	34.49
Sewer	49.31
Garbage	64.29
Sales Tax	5.68
Grand Totals:	248.29

## Customer History

The customer history report will give all the financial transactions for the selected customer for the time period requested. The section needed on the report can be selected by checking the box for that section. If all sections are selected the report can be long. The most popular version of the report is 1 year of history.

## Customer List

The customer list has four master reports, the customer list dash active customers and customer account summaries for collection codes, customer type and group codes. The default columns are customer number, name, service address and account balance, but any columns from the customer, location, customer type and collection codes are available.

Anycity Corporation Customer List - Active Customers Sep 14, 2017

## Meter History Report

The meter history report can print a summary or detailed history for the meter. The services slash action codes tab can be used to customize what is displayed on this report. Summary shows meter status, current install date, original install date, age of the meter, number of years at the current location and the install and or removal information. The detail will show all meter activity.

## Meter Reading Exception Report

The meter reading exception report is the main report used for verifying meter readings. It can be run as one report or separated into reports for each exception. This report has recently been rewritten and has new exceptions available.

There is now an option to check for multiple consecutive periods on any of the exceptions. For example, this paired with active with no usage can give a list of possible stopped meters. Note the date range must include the number of periods selected. Active with no reading will give skipped reads. Active with no usage will give meters with 0 consumption. Inactive with usage are meters that are not active in Caselle but have usage. Exact same usage are meters that have the same usage from period to period. This used in conjunction with check consecutive periods can check meters that have exactly the same usage for many billing periods. Meter with a register that rolled over will list all rollovers. Meteor activity with information codes is usually used to check estimates. Meter usage outside the high low range will now give the option to change the high low check on the report.

**Caselle Connect® Meter Reading Exception Report**

Definition: Meter Reading Exception Report - by Customer Number [Caselle Master] Filter: All 1 of 2

**Report Options** Additional Options Columns Print Settings

**Report dates**

From: 04/01/2020 To: 04/30/2020

☐ Check 2 consecutive periods

☐ Include only period meter readings

**Exceptions to check for**

☒ Active with no reading

☒ Active with no usage

☒ Inactive with usage

☐ Exact same usage

☐ Meter with a register that rolled over

☐ Meter activity with information codes

**Information Code**

☒ Broken Meter

☒ Check for Tampering

☒ Estimated Reading

☒ Locked Gate - Key in Office

☒ Meter usage outside the high/low range

☒ Use service options

☐ Use: Percentage

☒ Based on 1 previous periods

☐ Based on the same period in the prior year

Low: .0000 %

High: .0000 %

## Report Criteria:

- Checking for active meters with an active billing service and no reading
- Checking for active meters with an active billing service and no usage
- Checking for inactive meters and/or billing services with usage
- Checking for meters with the exact same usage
- Checking for registers that have rolled over
- Checking for high/low usage

## Service Exception Report

The service exception report is used to find accounts that may be missing services. For example, it can find accounts that have water but not sewer or electric but not PCAC.

Anycity Corporation		Service Exception Report - by Customer Number	
		Service: PCAC	
Report Criteria:			
Only includes customers with Electric

## Transaction Register

The transaction register is similar to transaction allocation by service report and that it will display any transactions however it does not break them down by service allocation. This is also a very versatile report that can be payments, adjustments, billing etcetera. Basically, any type of financial transactions can be chosen to print on this report.

## Report Writer

### What are the options for reporting in Caselle?

**Pro Tip-** if a predefined report exists, use it as a starting point

#### Option #1: Pre-defined (canned) reports

- These are the most common reports that almost any utility would need for its operations
- Advantages
  - Configurable –add fields, change formats, etc.
  - Provide summarized data that is otherwise hard to get it
  - It already exists – you don't have to recreate the wheel
- Disadvantages
  - Might not provide the exact data you want

**Pro Tip-** You must use table lists for forms and mailing label reports

#### Option #2: Table Lists

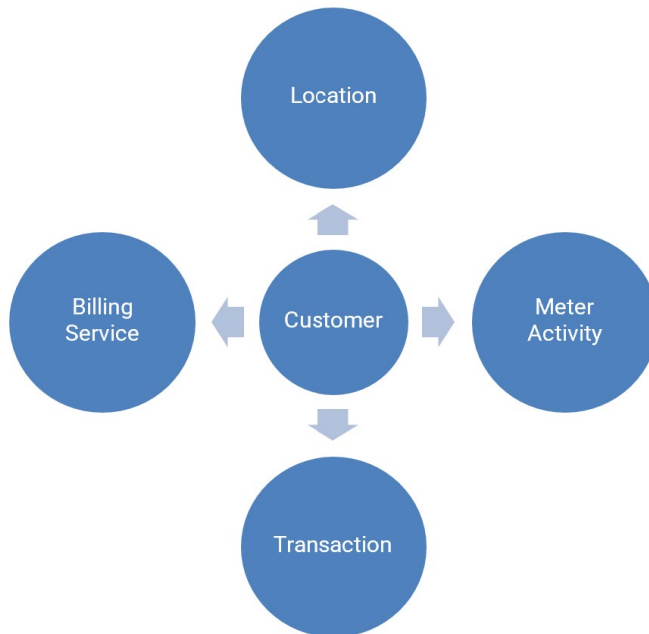

- Caselle's legacy custom report writer
- Advantages
  - Provides direct reporting access to (almost) all tables and fields in the system
  - Multiple report format options (list, labels, forms, export)
- Disadvantages
  - It can be complicated to use
  - It is based on table records, sometimes hard to provide summary information.

**Pro Tip-** If you use table lists, start migrating to report writer.

#### Option #3: Custom Report Writer

- Caselle's replacement for table lists
- Advantages
  - Provides direct reporting access to almost all tables and fields in the system.
  - Wizard Makes it easier to use
- Disadvantages
  - No forms or mailing labels – at least, not yet.
  - Summary information is sometimes still complicated

## How is Caselle Structured?

Caselle stores all of its data in...

Tables that contain

Rows for each record and

Columns for each field.

Tables are related to each other so that data is not duplicated in multiple records.

**Pro Tip-** See Appendix A for screenshots with the source tables for common fields.

## Database joins are the power of reporting in Caselle

When we build a report, we often need to pull data from more than one of the tables or objects in Caselle.

- Tables are related based on predefined relationships and common key values,
- In both clarity and connect, these keys are hidden ID fields that you never see in the program, they are only in the database
- This is the part that made table lists hard
- Report writer simplifies pulling the tables together

### How do joins work?

A common field in 2 tables is matched and the results are presented as a single data set.

**Customer Table**

ID	Customer #	Name	<u>LocationID</u>
1	1.101.01	Acme Manufacturing	15
2	1.104.01	Smith, Dr. Ronald T.	23
3	1.112.01	Betty's Fabric Shop	7

**Location Table**

ID	Location #	Service Address
7	1112	40 N Commerce Ave
15	1101	4661 Monaco Street
23	1104	665 E Parkway

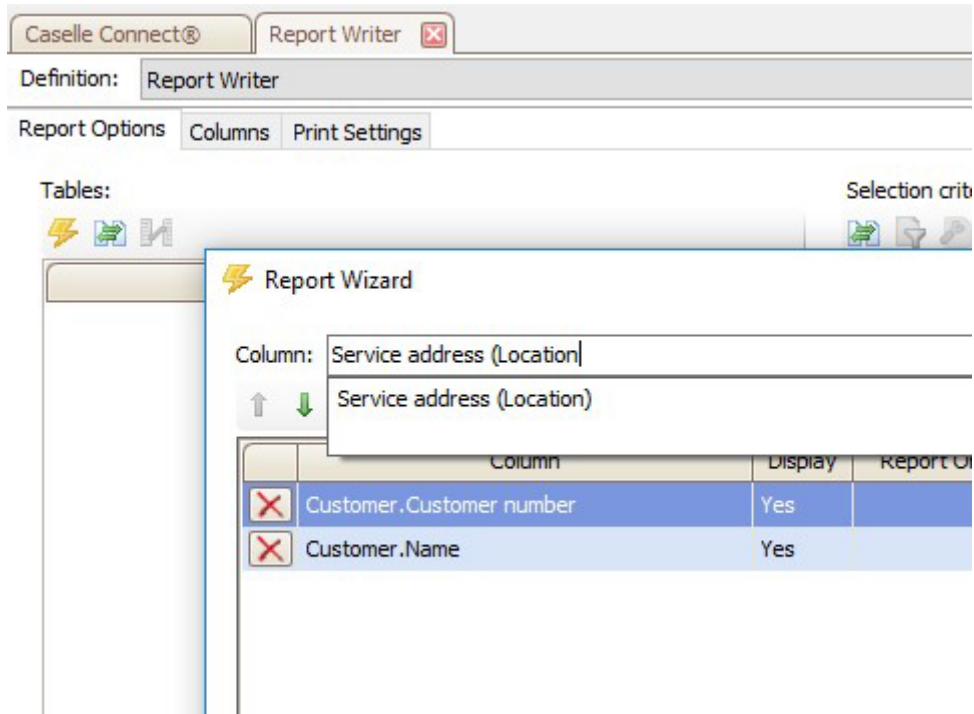

**Customer Joined to Location**

Customer #	Name	Service Address
1.101.01	Acme Manufacturing	4661 Monaco Street
1.104.01	Smith, Dr. Ronald T.	665 E Parkway
1.112.01	Betty's Fabric Shop	40 N Commerce Ave

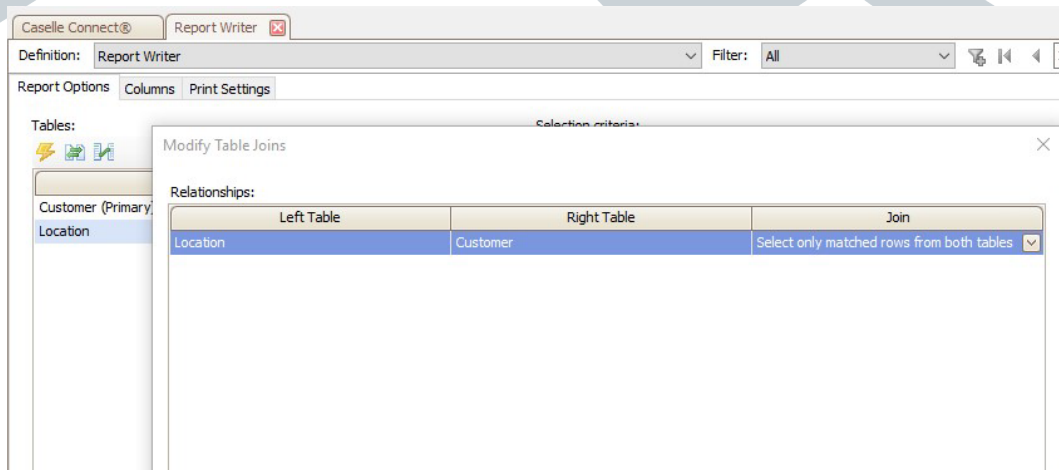

## The Report Wizard

Allows you to just type in a field name, and Caselle will pull the related tables into the report for you.

## Modify Joins

Caselle now gives you specific control over how tables are joined together in reports.

### Selection criteria:

Column	Value	Compare
Customer.Final bill date	{is not null}	Entire field

### Report order:

Column	Sort	Title	Total	Line	Page	Use
Location.Location number	Ascending	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Entire field

### Report sections:

Section	Print	Headings	Detail	Totals	Line	Page
Main	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Report Options

All of the standard report options for selection criteria comma report order and sections are still available in report options.

## Real World Examples

### Example #1

Is there a way for me to pull a report together that lists all of the new customer setups I did for a month?

### Example #2

I'm wondering if there is a way to create a report with all the active accounts in the system showing the address, meter size, meter location, user defined field lateral size and cross connect?

### Example #3

I'm trying to make a report that will give me the customer name, name address, and credit calculation average on sewer.

I'm trying to find any customer that has a zero credit calculation average on sewer before I process my next bills so that I can get them fixed prior to the calculation of the bill.

### Example #4

Report with latitude and longitude, there are a bunch of meters with no service address can they be deleted?

### Example #5

I need a report I can download into excel and manipulate the data as well as add columns and data the information I need out of the customer account is account number, name, service address, mailing address, Social Security number and active date.

## Database Table Structure

The following slides from customer inquiry show where the data is stored in Caselle. Fields are circled in different colors to indicate their source table and labeled in the screenshots to give you a start on understanding where the data is coming from.
